#### ABSTRACT

This resource guide provides information on the content, source, and price of various print and media materials that are available nationally that may be of help to personnel in the field of support employment. The guide is organized in six sections that cover the following materials: (1) books and book chapters; (2) training materials; (3) newsletters; (4) journal articles; (5) journals; and (6) videotapes. Each listing includes bibliographic citation, content description, address of source, and cost. Some of the topics covered include federal programs for people with disabilities, head injuries, low-cost approaches to technology and disability, employment outcomes for persons with brain injuries, community placement, quality of life for persons with disabilities, and career development for disabled persons. **Institute on Community Integration** University of Minnesota

## Introduction

There are numerous print and media resources currently available to supported employment personnel, resources that can make a difference in how you approach the challenges and opportunities you face in offering direct supported employment assistance or as the administrator of such a program. This resource guide provides information on the content, source, and price of various materials that are available nationally. The listing of a specific resource is not necessarily an endorsement of that product. This guide simply provides information about those materials that are available as a starting point for your further evaluation of those resources that interest you.

This resource guide was developed by the Institute on Community Integration at the University of Minnesota, in collaboration with the Minnesota Division of Rehabilitation Services. We hope that it will be of use as you search for ideas that will enhance your instructional programs, agency mission, or other supported employment activities. We welcome your comments and questions about the guide, including suggestions for revisions to future editions. Address correspondence to Institute on Community Integration, University of Minnesota, 6 Pattee Hall, 150 Pillsbury Drive SE, Mineapolis, MN 55455. The telephone number is (612) 624-4848.

Teri Wallace, M.A.

## Acknowledgements

We would like to thank the following individuals for reviewing this resource guide and for contributing materials and ideas:

- Ed Boeve, Minnesota Department of Jobs and Training, Supported Employment Project
- · Sandie Brown, Minnesota Department of Human Services, Mental Health Division
- Stephanie Corbey, Minnesota Department of Education, Office of Transition
- · Claire Courtney, Minnesota Division of Rehabilitation Services, Department of Jobs and Training
- Bonnie Holt, Minnesota Vocational Association for Special Needs Personnel
- Ron Kaliszewski, Minnesota Governor's Planning Council on Developmental Disabilities
- Ron Koebnick, Minnesota Department of Education, Secondary Vocational Education
- · Jim McCaul, Minnesota Habilitation Coalition
- Ralph McQuarter, Minnesota Department of Human Services, Division for Persons with Developmental Disabilities
- Sherri Mortenson-Brown, Minnesota Association for Rehabilitation Facilities
- jerry Mueller, Minnesota Developmental Achievement Center Association
- Kim Rezek, Minnesota Division or Rehabilitation Services, Department of Jobs and Training

We would also like to thank Shelley Tait, Jeff Boevers, and David Prunty, research assistants at the University of Minnesota, for their efforts in the development of this publication.

This publication is made possible by funding from the Minnesota Technical Assistance Resource Network on Supported Employment, a collaborative effort of the Institute on Community Integration at the University of Minnesota and the Minnesota Division of Rehabilitation Services (Grant #21200/22509&10).

The University of Minnesota is an Equal Opportunity Employer.

### III. Newsletters

• What's Working in Supported Employment? Institute on Community
Integration, University of Minnesota, 6 Pattee Hall, 150 Pillsbury Drive S.E.,
Minneapolis, MN 55455. Telephone: (612)624-4848.

Content: A newsletter outlining ideas, strategies, and practices related to supported employment from agencies and programs in Minnesota. This newsletter is published by the Minnesota Technical Assistance Resource Network on Supported Employment (MNTARN) at the Institute on Community Integration, University of Minnesota. It provides a resource section and a calendar of training events taking place in Minnesota.

• <u>Iob Coach News Brief.</u> Institute on Community Integration, University of Minnesota, 6 Pattee Hall, 150 Pillsbury Drive S.E., Minneapolis, MN 55455. Telephone: (612)624-4848.

Content: This newsletter provides job coaches/employment specialists with information regarding current training, relevant articles, contributions from the field, and other news related to the role of job coach/employment specialist.

• IMPACT: Feature Issue on Supported Employment (Spring, 1989). Institute on Community Integration, University of Minnesota, 6 Pattee Hall, 150 Pillsbury Drive S.E., Minneapolis, MN 55455. Telephone: (612)624-4848.

Content: This issue of the newsletter includes contributions from many local, state and national experts in the area of supported employment. <u>IMPACT</u> is published quarterly by the Institute on Community Integration, and each quarter it addresses a different issue in the field of developmental disabilities.

• On the lob. Institute for Human Resource Development, 78 Eastern Boulevard, Glastonbury, Connecticut 06033. Telephone: (203)659-1166.

Content: A newsletter for employment specialists/job coaches from Connecticut's Corporation for Surported Employment.

The Support Report. Supported Employment Technical Assistance Project, B125 West Fee Hall, Michigan State University, East Lansing, MI 48824. Telephone: (517)355-0166.

Content: A newsletter about supported employment published by Michigan State University's Supported Employment Technical Assistance Project.

RRTC. Rehabilitation Research and Training Center at Virginia Commonwealth University, 1314 West Main Street, VCU Box 2011, Richmond, VA 23284-0001. Telephone: (804) 367-1851.

Content: This newsletter describes current research in the area of supported employment.

The Technology Connection. Consumer Connection. and Training Connection.

Research and Training Center, Stout Vocational Rehabilitation Institute,
School of Education and Human Services, University of Wisconsin-Stout,
Menomonie, WI 54751. Telephone: (715)232-2236.

Content: Three newsletters published by the Research and Training Center at the University of Wisconsin-Stout:

The Technology is published once a year and provides consumers and practitioners with information on technology available for consumer and professional applications in rehabilitation and employment.

Consumer Connection provides consumers and advocates with straight forward, up-to-date information on Center research findings, special issues of concern in community-based rehabilitation, and upcoming events.

Training Connection is intended for staff development and inservice training personnel.

INTERCHANGE. Transition Institute, Secondary Transition Intervention Effectiveness Institute, National Center for Research in Vocational Education, College of Education, University of Illinois at Urbana- Champaign, 110 Education Building, 1310 South Sixth Street, Champaign, IL 61820. Telephone: (217)333-2325.

Content: This newsletter contains information related to the fields of transition and vocational education for special needs populations. It includes information about National Center activities, programs and projects, conferences, and resources.

• The Advance. The Association for Persons in Supported Employment, P.O. Box 27523, Richmond, VA: 23261-7523. Telephone: (804)266-6950.

Content: The Advance is the newsletter of the Association for Persons in Supported Employment. The Association was formed to promote the concept of paid integrated employment and community participation for all individuals. The newsletter provides information regarding this mission to its members.

• <u>SEPT/TA Memo</u>. PACER Center, 4826 Chicago Avenue South, Mpls., MN 55417-1055. Telephone: (612)827-2966.

Content: The <u>SEPT/TA Memo</u> is published by the Supported Employment Parent Training Technical Assistance Project, a national program of PACER Center. The newsletter provides information to projects involved in parent training in supported employment.

• RS Dialogue. Minnesota Department of Jobs and Training, Rehabilitation Services Division, 390 North Robert Street, St. Paul, Minnesota 55101. Telephone: (612)296-2713.

Content: RS Dialogue is published bi-monthly and contains articles and stories related to the provision of rehabilitation services.

• MHC Business Briefs. Minnesota Habilitation Coalition, 1141 89th Avenue, N.E., Blaine, Minnesota 55434. Telephone: (612)786-1127.

Content: The Minnesota Habilitation Coalition is an association which represents training and habilitation agencies in Minnesota. <u>MHC Business Brief</u> is a newsletter which contains information of interest to the association's membership.

• MNDACA News and Review. Minnesota Developmental Achievement Center Association, Griggs Midway Building, Suite 277-S, 1821 University Avenue, St. Paul, Minnesota 55104. Telephone: (612)647-9200.

Content: MNDACA News & Review is produced and distributed as a service to members of the Minnesota Developmental Achievement Center Association. It contains a wealth of information intended to keep its membership informed of current policy, training, etc.

• MARF Newsletter, Minnesota Association of Rehabilitation Facilities, Griggs Midway Building, Suite 376-S, 1821 University Avenue, St. Paul, Minnesota 55104. Telephone: (612)646-0900.

Content: <u>MARF Newsletter</u> contains information regarding current policy, training events, etc. of interest to rehabilitation personnel.

DD Information Exchange. Metropolitan Council, Mears Park Centre, 230 East Fifth Street, St. Paul, Minnesota 55101. Telephone: (612)291-6427.

Content: <u>DD Information Exchange</u> is published monthly by the Developmental Disabilities Program of the Metropolitan Council. It contains information regarding activities, notices, services, products, and training related to the needs of persons with developmental disabilities.

• Mental Health Advocate. Alliance for the Mentally III of Minnesota, 1595 Selby Avenue, #103, St. Paul, Minnesota 55104 Telephone: (612) 645-2948.

Content: Mental Health Advocate contains information addressing general issues in the field of mental health.

• Headlines. Minnesota Head Injury Association, 1313 5th Street S.E., Suite 311, Minneapolis, Minnesota 55414. Telephone: (612)379-3911.

Content: Headlines contains information related to traumatic brain injury.

\* Spotlight. Minnesota Rehabilitation Association, 390 North Robert Street, St. Paul, Minnesota 55101. Telephone: (612)296-5646.

Content: Spotly ht contains information regarding general rehabilitation issues.

Connector. Voice of the Minnesota State Council on Disabilities, Metro Square Building, Suite 145, 7th Place and Jackson Street, St. Paul, Minnesota 55101. Telephone: (612)296-6785 or (800)652-9747.

Content: Connector contains information regarding disability related issues. It introduces training, new programs, resources, etc.

• <u>Job Training News.</u> Public Information and Education Office, 390 North Robert Street, St. Paul, MN 55101. Telephone: (612)296-7989.

Content: This newsletter contains information on state and federal job training programs in Minnesota.

## IV. Journal Articles

Agran, M., Fodor-Davis, J., Moore, S., & Deer, M. (1989). The application of a self-management program on instruction-following skills. <u>Journal of The Association for Persons with Severe Handicaps</u>, 14(2), 147-154.

Content: Results of a study addressing the Tects of a self-manangement program on the instruction-following behaviors of five students with moderate to severe disabilities. The results demostated that training was effective in teaching students to respond appropriately to instructions given during a vocational skills training program.

 Agran, M. (1987). Teaching self-control procedures to individuals who are mentally retarded. <u>Career Development for Exceptional Individuals</u>, 10, 107-115.

Content: This article reviews the research literature on self-control training, concluding that it represents an effective technology in enabling employment success for persons with mental retardation. Unexplored issues relevant to self-control are also identified.

Anthony, W.A., & Blanch, A. (1987). Supported employment for persons who are psychiatrically disabled: An historical and conceptual perspective.

Psychosocial Rehabilitation Journal, XI(2), 5-23.

Content: A description of how the supported employment approach, historically used with persons with developmental disabilities, is currently being adapted for persons with psychiatric disabilities.

Baumgart, D. and Van Walleghem, J., (1986). Staffing strategies for implementing community-based instruction. <u>Journal of The Association for Persons with Severe Handicaps</u>, 11(2), 92-102.

Content: A description of eight staffing strategies that can be used to implement community-based instruction. The article lists recommendations for enhancing the implementation of community-based instruction, as well as the advantages and disadvantages which may result.

Bellamy, G.T., Rhodes, L.G., Wilcox, B., Albin, J.M., Mark, P.M., Horner, R.H., Collins, M., and Turner, J. (1984). Quality and equality in employment services for adults with severe handicaps. <u>Journal of The Association for Persons with Severe Handicaps</u>, 9(4), 270-277.

Content: An argument attesting to the need of equality in employment services for adults with severe disabilities. This article was written in response to an article by Brown, et al (1984) that proposes a training program involving work without pay in integrated settings for adults with developmental disabilities.

Berkell, D.E. (ND). Vocational assessment of students with severe handicaps: A review of the literature. <u>Career Development for Exceptional Individuals</u>, 10, 61-75.

Content: An examination of the literature presenting an overview of the current state of the art practices in vocational assessment for people with severe disabilities.

Breen, C., Haring, T., Pitts-Conway, V., & Gaylord-Ross, R. (1985). The training and generalization of social interaction during breaktime at two job sites in the natural environment. <u>Journal of The Association for Persons with Severe Handicaps</u>, 10(1), 41-50.

Content: Four high-school age students with autism and severe disabilities received social skill training at competitive job breakroom sites. All participants acquired the behaviors trained; two students generalized the behaviors to non-trained coworkers before the completion of instruction, and two required training with multiple peers in order to generalize.

Bullis, M., & Foss, G. (1986). Assessing the employment-related interpersonal competence of mildly mentally retarded workers. American <u>Journal of Mental Deficiency</u>, 91(1), 43-50.

Content: The development and psychometric properties of the Test of Interpersonal Competence for Employment (TICE) are described. TICE seeks to measure the interpersonal skills essential to employment settings.

Castles, E.E., & Glass, C.R. (1986). Training in social and interpersonal problem-solving skills for mildly and moderately mentally retarded adults. American Journal of Mental Deficiency, 91, 35-42.

Content: A program evaluation of social skills training and interpersonal problem-solving training, as well as a combination intervention strategy utilizing both components, produced improvement for the participants in these nicasures. However, the skills were not generalized to untrained role-play situations.

Chadsey-Rusch, J., Gonzalez, P., Tines, J., & Johnson, J.R. (1989). Social ecology of the workplace: Contextual variables affecting social interactions of employees with and without mental retardation. <u>American Journal on Mental Retardation</u>, 94(2), 141-151.

Content: The social interactions of employees with and without mental retardation were observed, coded and analyzed; implications for integrated work settings were discussed.

Chadsey-Rusch, J., & Gonzalez, P. (1988). Social ecology of the workplace: Employers perceptions versus direct observations. Research in Developmental Disabilities, 2, 229-245.

Content: Observation of typical employee social interactions on the job were recorded which confirmed their employers' expectations for such interaction. The authors relate these findings to vocational curriculum for persons with handicaps.

Chamberlain, M.A. (1988). Employer's rankings of factors judged critical to job success for individuals with severe disabilities. <u>Career Development for Exceptional Individuals</u>, 11(2), 141-147.

Content: Factors which employers thought is secritical to job success were identified through this study. The top four factors which employers identified as critical were: (1) getting along well with others, (2) interest in the job, (3) efficiency, and (4) dependability.

• Chow, S.L., (1986). Comparison of sheltered and supported work programs: A pilot study. Rehabilitation Counseling Bulletin. 30(2), 66-82.

Content: A comparison of two random samples of workers with developmental disabilities, one sample from sheltered workshops, the other from a supported work program. They were compared in terms of client characteristics, program effectiveness, cost effectiveness, and job satisfaction.

Conley, R.W., Rusch, F.R., McCaughrin, W.B., & Tines, J. (1989). Benefits and costs of supported employment: An analysis of the Illinois supported employment project. <u>Journal of Applied Behavior Analysis</u>, 22(4) 441-447.

Content: A cost-benefit analysis was conducted for the Illinois Supported Employment Project. Results showed that society obtained a \$0.75 return for every \$1.00 invested in supported employment, and supported employees received a 37% increase in their earnings.

Conley, R.W., (1986). Employment of developmentally disabled persons:
Obstacles inherent in he service system. Remedial and Special Education,
2 (6), 31-36.

Content: A rationale suggesting that public programs providing employment services and support to adults with developmental disabilities should be better coordinated, focus on transitional and supported work activities, and provide incentives to motivate persons with disabilities.

Connis, R.T., Sowers, J., Thompson, L.E., & Rusch, F.R. (1977). Training retarded adults for competitive employment. <u>Forum for Behavior Technology</u>, 2, 6-8.

Content: A description of the Food Service Vocational Training Program (FSVTP), an early vocational behavioral analysis program utilizing on-the-job training approaches to teach a variety of work and work-related technical and social skills to adults with mental retardation.

Cuvo, A.J., Leaf, R.B., & Borakove, L.S. (1978). Teaching janitorial skills to the mentally retarded: Acquisition, generalization, and maintenance.
 Journal of Applied Behavior Analysis, 11, 345-355.

Content: Evidence that models for training vocational skills can be effective is presented in this evaluation of a janitorial skills training program for six adelescents with moderate mental retardation.

 Danely, K.S., & Anthony, W.A. (1987). The choose-get-keep model: Serving severely psychiatrically disabled people. <u>American Rehabilitation</u>, October-December.

Content: A presentation of the choose-get-keep model of supported employment for persons with psychiatric disabilities. The critical concepts and programatic implications of this model are described.

Donnellan, A.M., Lavigna, G.W., Zambito, J., & Thvedt, J. (1985). A timelimited intensive intervention program mode! to support community placement for persons with severe behavior problems. <u>Journal of The Association for</u> <u>Persons with Severe Handicaps</u>, 10(3), 123-131.

Content: A program model utilizing nonaversive strategies in dealing with severe behavior problems in a widely diverse range of clients in community settings is described, and the effectiveness of the model is demonstrated by the results of a two-year program evaluation.

Elksnin, N., & Elksnin, L.K. (1988). Improving job-seeking skills of adolescents with handicaps through job clubs. Career Development for Exceptional Individuals, 11(2), 118-125.

Content: A description of the Job Club strategy used for job-seeking.

Farley, R.C., & Hinmans, S., (1987). Enhancing the potential for employment of persons with disabilities. <u>Rehabilitation Counseling Bulletin</u>, 3(11), 4-16.

Content: A comparison of two interventions to enhance career development. Situation-specific intervention based on skills deficit model and intervention combining skills deficit and inhibition models were implemented. Both interventions were superior to no intervention control, however, combination intervention was superior to the other intervention.

Gaylord-Ross, R., Gaylord-Ross, C., Hagie, C., Musante, P., Lee, M., Siegel, S., & Jameson, D. (1988). Considerations and outcomes in transitional supported employment. <u>Career Development for Exceptional Individuals</u>, 11, 42-50.

Content: A description of a supported employment program serving special education graduates. Retention strategies which promoted social interactions with co-workers without disabilities and transferring supervision to staff of the specific business were stressed.

Gaylord-Ross, R., (1986). The role of assessment in transitional, supported employment. Career Development for Exceptional Individuals, 2(2), 129-134.

Content: An examination of the important factors in assessing performance of individuals with disabilities in transitional, supported employment including secondary vocational performance, assessment and placement, resources for supported employment, assessment of on-the-job performance, and supervision.

Glascoe, F.P., & Levy, S.M. (1987). The work behavior of employees with and without handicaps. <u>Career Development for Exceptional Individuals</u>, 10, 95-105.

Content: This study sought to identify and compare the work-related social behaviors as well as strictly work behaviors of persons with and without handicaps. Characterizing the behaviors of workers without handicaps is especially important in that it provides a definition of what is desirable work and work-related behaviors.

41

Hamre-Nietupski, S., Krajewski, L., Nietupski, J., Ostercamp, D., Sensor, K., & Opheim, B. (1988). Parent/professional partnerships in advocacy: Developing integrated options with resistive systems. <u>Journal of The Association for Persons with Severe Handicaps</u>, 13(4), 251-259.

Content: Strategies for advancing integrated educational options through the joint advocacy partnership of parents and professionals are explored, drawing from experience and from the literature.

Hill, M.L., Banks, P.D., Handrich, R.R., Wehman, P., Hill, J.W., & Shafer, M.S. (1987). Benefit-cost analysis of supported, competitive employment for persons with mental retardation. <u>Research in Developmental Disabilities</u>, <u>8</u> (1), 71-89.

Content: An examination of the unemployment rates among adults with mental retardation. The societal impact of the number of adults with mental retardation who remain unemployed is discussed. A supported, competitive employment program for adults with severe disabilities in Virginia is reviewed.

Hill, L.M., Wehman, P.H., Kregel, J., Banks, P.D., and Metzler, H., (1987). Employment outcomes for people with moderate and severe disabilities: An eight-year longitudinal analysis of supported, competitive employment.

Journal of The Association for Persons with Severe Handicans, 12(1), 182-189.

Content: A summary of the results of an eight-year study of the cost-benefit analysis of people with mental retardation who have received supported, competitive employment services.

Hughes, C., & Rusch, F.R. (1989). Teaching supported employees with severe mental retardation to solve problems. <u>Journal of Applied Behavior Analysis</u> 22(4) 365-372.

Content: A combined strategy, using self-instruction and multiple exemplar training, was used to train two supported employees to problem solve.

Ianacone, R.N., & Leconte, P.J. (1986). Curriculum-based vocational assessment: A viable response to a school-based service delivery issue. <u>Career Development for Exceptional Individuals</u>, 2, 113-119.

Content: A position paper supporting the development of curriculum-based vocational assessment processes for transitioning students. The authors also provide a structured outline for establishing such a program.

Inge, K.J., Banks, P.D., and Wehman, P. (1988). Quality of life for individuals who are labeled mentally retarded: Evaluating competitive employment versus sheltered-workshop employment. <u>Education and Training in Mental Retardation</u>, 23(2), 97-104.

Content: A comparison of quality of life between 20 individuals with mental retardation in competitive employment to a matched group in a sheltered workshop setting. Results show the competitively employed experienced greater advancement, community participation, and financial outcomes.

Karan, O.C., Brandenburg, L., Sauer, M., Yoder, D.E., Mathy-Laikko, P., Villarruel, F., and Dolan, T.R., (1986). Maximizing independence for persons who are developmentally disabled: Community-based programs at the Waisman Center University Affiliated Facility. <u>Journal of The Association for Persons with Severe Handicans</u>, 11(4), 286-293.

Content: A description of four interdisciplinary programs for persons with developmental disabilities:
1) paraprofessional degree training program, 2) supported employment for institutionalized adults, 3) a service/research program in communication technology and training for non-speaking persons, and 4) a communication skills program for persons who have developmental disabilities.

 Karp, F., & Flowers, S.M. (1988). Traumatic brain injury: Finding the information. <u>Rehabilitation Counseling Bulletin</u>, 31.

Content: A presentation of selected research activities and resources related to traumatic brain injury.

Kennedy, C.H., Horner, R.H., & Newton, J.S. (1989). Social contacts of adults with severe disabilities living in the community: A descriptive analysis of relationship patterns. <u>Journal of The Association for Persons with Severe</u> <u>Handicaps</u>, 14(3), 190-196.

Content: A report which addresses the social interaction patterns of 23 adults with severe disabilities across a two and a half year period. Results suggest that on the average social contacts occurred once every two days. Additional results and implications of the results for further research are discussed.

Kiernan, W.E., & Ciberowski, J. (1986). Survey of employment for adults with developmental disabilities. <u>Remedial and Special Education</u>, 7(6), 25-30.

Content: A survey of 1,629 United States rehabilitation facilities and organizations revealed that more persons with developmental disabilities are being hired in competitive employment settings and that job retention is good.

Kregel, J., Hill, M., & Banks, P.O. (1988). Analysis of employment specialist intervention time in supported competitive employment. American Journal on Mental Retardation, 93(2) 200-208.

Content: An analysis of the intervention time that employment specialists provide to persons in supported competitive jobs is described in this article. Results show that during the first month persons with more severe disabilities did not require more intervention time.

Kregel, J., Wehman, P., & Banks, P.D. (1989). The effects of consumer characteristics and type of employment model on individual outcomes in supported employment. <u>Journal of Applied Behavior Analysis</u>, 22(4), 407-415.

Content: This article examines the effect rarious consumer characteristics and supported employment strategies have on selected outcomes (wages earned, hours worked, level of integration).

Likins, M., Salzberg, C.L., Stowitschek, J.J., Lignugaris/Kraft, B., & Curl, R. (1989). Co-worker implemented job training: The use of coincidental training and quality-control checking on the food preparation skills of trainees with mental retardation. Journal of Applied Behavior Analysis 22. (4), 381-393.

Content: This article reports on two studies which examined the effects of coincidental training on the skills of workers with mental retardation.

Mank, D., & Horner, R.H. (1987). Self-recruited feedback: A cost-effective procedure for maintaining behavior. Research in Developmental Disabilities, 8, 91-112.

Content: The use of a self-management procedure for the purposes of maintaining and improving the work skills of young adults with severe disabilities in integrated settings is examined.

Martin, J.E., & Hursch, J.V. (1987). School-based vocational programs and labor laws. <u>Journal of the Association for Persons with Severe Handicaps</u>, 12(2), 140-144.

Content: A review of the rules and regulations of the U.S. Fair Labor Standards Act in relation to school-based vocational programs.

McDonnell, J., Nofs. D., & Hardman, M. (1989). An analysis of the procedural components of supported employment programs associated with employment outcomes. <u>Journal of Applied Behavior Analysis</u>, 22(4), 417-428.

Content: This study examines the relationship between the procedures involved with supported employment and the outcomes for individuals involved in supported employment.

Menchetti, B.M., Rusch, F.R., & Lamson, D.S. (1981). Social validation of behavioral training techniques: Assessing the normalizing qualities of competitive employment training procedures. <u>Journal of The Association for Persons with Severe Handicaps</u>, 6, 6-15.

Content: A survey indicated that employers differentially accepted the use of some training procedures based upon knowledge of workers' handicapped or non-handicapped status.

 Montague, M. (1988). Job-related social skips training for adolescents with handicaps. <u>Career Development for Exceptional Individuals</u>, 11, 26-41

Content: A study of the initial and long-term outcomes of job-related socialization training for persons with disabilities. Direct instruction in 10 social skills and monitoring skill use in work environments was the approach used.

Morrow, S.A., & Bates, P.E. (1987). The effectiveness of three sets of school-based instructional materials and community training on the acquisition and generalization of community laundry skills by students with severe handicaps. Research in Developmental Disabilities, 8, 113-136.

Content: Implications for school versus community-based training are discussed following a study which revealed that direct training in one of the community settings was more successful for the maintenance and generalization of the laundromat skills for students with severe handicaps.

Nietupski, J., Donder, D.J., Houseley, M., & Anderson, R.J., (1988). Productive administrative strategies for implementing community-based programs for students with moderate/severe handicaps. Education and Training Mental Retardation. 23(2), 138-161.

Content: A discussion of the role of agency-sponsored job coaches in integrated work environments. Alternative options for active participation of supervisors and co-workers are recommended for implementation.

Nisbet, J., & Hagner, D. (1988). Natural supports in the workplace: A re-examination of supported employment. <u>Journal of The Association for Persons</u> with Severe Handicans, 13(4), 260-267.

Content: A discussion of the role of agency-sponsored job c-suches in integrated work environments. Alternative options for active participation of supervisors and co-workers are recommended for implementation.

Nisbet, J., & York, P. (1989). Indices of job satisfaction of persons with moderate and severe disabilities. <u>Education and Training in Mental Retardation</u>. September, 274-280.

Content: An examination of behaviors which were found to indicate job satisfaction among workers with moderate and severe disabilities.

Nisbet, J., & Vincent, L.(1986). The differences in inappropriate behavior and instructional interactions in sheltered and nonsheltered work environments.

<u>Journal of The Association fc: Persons with Severe Handicaps.</u> 11(1), 19-27.

Content: Fifteen workers in both nonsheltered work environments and sheltered work environments were observed during work and break times to assess the frequency of inappropriate behavior and instructional interactions from co-workers and supervisors. Results showed that workers in nonsheltered work environments were more involved in instructional interactions and exhibited less inapprint in interactions.

Noble, J.H., & Conley, R.W. (1987). Accumulating evidence on the benefits and costs of supported and transitional employment for persons with severe disabilities. <u>Journal of the Association for Persons with Severe Handicaps</u>, 12 (3), 163-174.

Content: A comparison of the benefits and costs of supported and transitional employment services with those of adult day care and traditional sheltered workshops. Sufficient information exists that indicates all forms of employment (supported, transitional and sheltered) are more productive and less costly than adult day care.

Park, H.S., & Gaylord-Ross, R. (1989). A problem-solving approach to social skills training in employment settings with mentally retarded youth. <u>Journal of Applied Behavior Analysis</u>, 22(4), 373-380.

Content: This study examined two approaches to teaching social behaviors to individuals with development disabilities in work cettings.

Pedhazur-Schmelkin, L., & Berkell, D.E. (1989). Educators' attitudes toward the employability of persons with severe handicaps. <u>Career Development for Excentional Individuals</u>, 12(1), 40-47.

Content: Factors which underlie a.....des toward the employability of persons with severe disabilities were isolated and discussed. Special educators generally were positive regarding the appropriateness of employment for persons with severe disabilities.

Porter, M.E., & Stodden, R.A. (1986). A curriculum-based vocational
assessment procedure: Addressing the school-to-work transition needs of
secondary schools. <u>Career Development for Exceptional Individuals</u>, 9, 121127.

Content: A model for the planning and implementation of a career/vocational curriculum for transitioning youth with disabilities is described, and its application is evaluated in one setting in Germany.

 Povett, D.L., & Harris, M.B. (1987). Identification of important community living skills for adults with mental retardation. <u>Rehabilitation Counseling</u> <u>Bulletin</u>, September 1987.

Content: Results of a questionnaire showed that vocational, social, and personal skills were considered more important than were leisure and academic skills for successful community living of adults with mental retardation.

• Rhodes, L., & Drum, C. (1989). Supposed employment in the public sector: Procedural issues in implementation. <u>Journal of The Association for Persons with Severe Handicaps</u>, 14(3), 197-204.

Content: A summary of the results of a survey which was conducted to identify policy or procedural barriers existing in the public sector that present problems in implementing supported employment. The authors offer recommendations for modification of the current practices in order to reduce the identified barriers.

Rhodes. L. & Ramsing, K. (1986). Economic evaluation of employment services: A review of applications. <u>Journal of The Association for Persons with Severe Handicaps</u>, 12(3), 175-181.

Content: An overview of benefit - cost analysis and its limitations and a review the applications of benefit - cost analysis within vocational programs for persons with severe disabilities.

47

Rhodes, L.E., & Valenta, L. (1985). Industry-based supported employment: An enclave approach. <u>Journal of The Association for Persons with Severe Handicans</u>, 10(1), 12-20.

Content: A summary of the positive results of a one year program model that provided ongoing supported employment to six persons with severe disabilities.

• Rhodes, L.E., (1986). Supported employment: An initiative for employing persons with severe developmental disabilities. <u>Remedial and Special Education</u>, 7(6), 12-17.

Content: This article advocates the idea that supported employment requires opportunities to be created before service commences and values the employment in the same environment as employees without disabilities.

• Richardson, S.A., Koller, H., & Katz, M. (1988). Job histories in open employment of a population of young adults with mental retardation.

<u>American Journal of Mental Retardation</u>, 22(6), 483-49.

Content: A survey of 54 persons with IQ's of 50 or more who received adult services showed that only half had obtained some open employment. Persons with mild mental retardation who received no adult services had significantly higher unemployment than typical peers who did not graduate.

• Rusch, F.R., & Hughes, C. (1989). Overview of supported employment. <u>Journal of Applied Behavior Analysis</u> 22(4), 351-363.

Content: The development of supported employment is outlined in this article as are the characteristics and definitions of supported employment. The influence of applied behavior analysis is described.

• Rusch, F.R., & Minch, K.E. (1988). Identification of co-worker involvement in supported employment: A review and analysis. Research in Developmental Disabilities, 9(3), 247-254.

Content: A description of roles that co-workers assume in providing support to employees with disabilities, including: validating instructional strategies, collecting subjective evaluations, designing and implementing training procedures, collecting social comparison information, and implementing behavior management programs in the context of employment.

Rusch, F.R., Schutz, R.P., & Agran, M. (1982). Validating entry-level skills for service occupations: Insplications for curriculum development. <u>Journal of The Association for Persons with Severe Handicaps</u>, 1(9), 32-41.

Content: Results of a study suggesting the skills necessary to include in a prevocational curriculum for persons with severe disabilities desiring employment in non-sheltered settings.

Salend, S.J., Ellis, L.L., & Reynolds, C.J. (1989). Using Self-instruction to teach vocational skills to individuals who are severely retarded. <u>Education and Training in Mental Retardation</u>. September, 248-254.

Content: A study showing the results of a self-instruction procedure on the vocational skills of four individuals with severe disabilities.

Salzberg, C.L., Lignugaris-Kraft, B., & McCuller, G.L. (1988). Reasons for job loss: A review of employment termination studies of mentally retarded workers. Research in Developmental Disabilities, 2, 152-170.

Content: Job loss studies over the past 35 years are reviewed. Some generalizations are presented based on the accumulated data, and the results are discussed in their relevance to job retention and training for workers with mental retardation.

Sandler, A.G., Thurman, S.K., Meddock, T.D., & Ducette, J.P. (1985).
 Effects of environmental modification of the behavior of persons with severe handicaps.
 10(3), 157-163.

Content: Results of a study comparing behavioral changes for newly-normalized adolescents with severe disabilities with institutionalized adolescents showed that day-to-day behavior was influenced positively in the more normalized environment.

• Shafer, M.S. (ND). <u>Supported competitive employment:</u> The use of selfmanagement programming in the follow-along process. Ric mond, VA: Virginia Commonwealth University, Rehabilitation Research and mining Center.

Content: Two case studies are presented in which self-management programming was utilized as part of the follow-along services.

Shafer, M.S., Hill, J., Seyfarth, J., & Wehman. P. (1987). Competitive employment and workers with mental retardation: Analysis of employers' perceptions and experiences. <u>American Journal of Mental Retardation</u>, 92(3), 304-311.

Content: A summary of the results of a survey of three groups of employers of persons with de relopmental disabilities who received supported competitive employment services.

Shafer, M.S., Kregel, J., Banks, S., & Hill, M.L. (1988). An analysis of employer evaluations of workers with mental retardation. <u>Research in Developmental Disabilities</u>, 2, 377-391.

Content: An analysis of written employer evaluations concluded that the following three factors lead to employment meanion: (1) worker's attendance, (2) punctuality patterns, and (3) consistency in task performance.

Shafer, M.S., Rice, M.L., Metzler, H.M.D., & Haring, M. (1989). A survey of nondisabled employees' attitudes toward supported employees with mental retardation. <u>Journal of The association for Persons with Severe Handicaps</u>, 14(2).

Content: A summary of the results of a survey used to assess the perceptions and experiences of employees without disabilities with co-workers with mental retardation. A discussion of the implications these moults have for supported employment provide of supported employment provides.

Schalogn, R. L., & Jensen, C.M. (1986). Assessing the goodness-of-fit between persons and their environments. <u>Journal of The Association for Persons with Severe Handicaps</u>, 11(2), 103-109.

Content: An outline of the assessment and qualification procedures involved in determining the goodness-of-fit (congruence) between persons and their environment.

Sowers, J., & Powers, L. (1989). Preparing students with cerebral palsy and mental retardation for the transition from school to community-based employment. <u>Career Development for Exceptional Individuals</u>, 12(1), 25-35.

Content: A description of the strategies and outcomes of the Oregon Transition to Employment Project (OTEP), which sought to address the transition and vocational issues faced by students with physical and multiple disabilities. The most positive outcomes were shown by those students who were employed.

Sowers, J., Rusch, F.R., Connis, R.T., & Cummings, L.E. (1980). Teaching mentally retarded adults to time-manage in a vocational setting. <u>Journal of Applied Behavioral Analysis</u>, 13, 119-128.

Content: For two out of three adult participants without time-telling abilities, a picture-prompt time-management instructional program was effective in the maintenance of required work behaviors as well as lunch and break times. However, time-telling ability did not increase.

Storey, K., & Knutson, M. (1989). A comparative analysis of social interactions of workers with and without disabilities in integrated work sites:
 A pilot study. Education and Training in Mental Retardation.
 September, 265-273.

Content: A description of a study which analyzed the similarities and differences between the interactions of workers with disabilities and workers without disabilities in community employment sites.

Stowitschek, J.J., McConaughy, E.K., Peatross, D., Salzberg, C.L., & Lignugaris-Kraft, B. (1988). Effects of group incidental training on the use of social amenities by adults with mental retardation in work settings. Education and Training in Mental Retardation, 23, 202-212.

Content: An increase in clients' use of social amenities, as well as generalization to other environments, was achieved by this training program in social amenities at the workplace.

Test, D.W., Grossi, T., & Keul, P., (1988). A functional analysis of the acouisition and maintenance of janitorial skills in a competitive work setting.

<u>Journal of The Association for Persons with Severe Handicans, 13</u>(1) 1-7.

Content: An examination of the use of supported employment to provide competitive janitorial work experience for a 10-year-old student with severe disabilities. Training consisted of a combination of total task presentation and an individualized prompting hierarchy.

Tindall, L.W., & Gugerty, J.J. (198"). Careers for persons with disabilities. <u>Journal of Career Development</u>, <u>13</u>(4), 5-13.

Content: A description of the project at the University of Wisconsin-Madison: "Replicating Jobs in Business and Industry for Persons with Disabilities". Guidelines for advocates of persons with disabilities are described.

51

Trach, J.S., & Rusch, F.R. (1989). Supported employment program evaluation: Evaluating degree of implementation and selected outcomes. American Journal on Mental Retardation, 94(2), 134-140.

Content: A program evaluation of vocational service agencies in Illinois revealed that persons with higher IQ's received less supportive services yet earned higher wages. Also, agencies which devoted more time to job development were more successful matching their client to the most appropriate position.

Wacker, D.P., Fromm-Steege, L., Berg, W.K., & Flynn, T.H. (1989). Supported employment as an intervention package: A preliminary analysis of functional variables. <u>Journal of Applied Behavior Analysis</u>, 22(4), 429-439.

Content: The employment of 51 individuals with mental retardation who were placed into 64 supported employment positions were evaluated based on the training and post-training components of supported employment.

Wacker, D.P., Berg, W.K., Visser, M.B., Egan, J.E., Berrie, P., Ehler, C., Short, B., Swatta, P., & Taslev, B. (1986). A preliminary evaluation of independence in a competitive employment setting. <u>Journal of The Association for Persons with Severe Handicaps</u>, 11(4), 246-254.

Content: Incidental behaviors related to independence were documented over a three-month training period at a competitive employment site for two students with moderate to severe mental retardation. Data showed that the non-trained incidental behaviors increased substantially.

• Wehman, P., West, M., Fry, P., Sherron, P., Groah, C., Kreutzer, J., & Sale, P. (1989). Effects of supported employment on the vocational outcomes of persons with traumatic brain injury. <u>Journal of Applied Behavior Analysis</u>, 22(4), 395-405.

Content: An individual placement model of supported employment was used to assist 5 males with severe traumatic brain injury. This article describes the process and the outcomes of the supported employment services.

Wehman, P., Hill, J.W., Wood, W., & Parent, W. (1989). A report on competitive employment histories of persons labeled severely mentally retarded. <u>Journal of the Association for Persons with Severe Handicaps</u>, <u>12</u>(1) 11-17.

Content: A description of the corecture employment experiences of 21 individuals with a label of severely mentally 1-arded over an o-year period. Part-time, entry-level service positions were the most common jobs worked.

Wehman, P., & Kregel, J. (1985). A supported work approach to competitive employment of individuals with moderate and severe handicaps. <u>Journal of The Association for Persons with Severe Handicaps</u>, 10(1), 3-11.

Content: The key features of a supported work approach to persons with moderate and severe disabilities in competitive settings are outlined, stressing the importance of competitive employment. The authors also propose strategies for integrating this approach into adult service agencies and secondary special education.

Wehman, P., Kreutzer, J., Wood, W., Morton, M.V., & Sherron, P. (1988).
 Supported work model for persons with traumatic brain injury: Toward job placement and retention. <u>Rehabilitation Counseling Bulletin</u>, 1(4), 298-312

Content: A description of a supported work model for persons with brain injuries. A literature review of post-injury vocational status of persons with brain injuries and a case study describing how this model can be effective in use are included.

Wehman, P., Kregel, J., Banks, D.P., Hill, M., & Moon, M.S. (1987).
Sheltered versus supported work programs: A second look. Rehabilitation Counseling Bulletin, 31(1), 42-53.

Content: An examination of a study done by Lam (1986) comparing sheltered and supported employment programs. A discussion of the study design and conclusions. Questions are presented concerning the interpretation of the outcomes.

• Wehman, P., Kreutzer, J., Wood, W., Morton M.V., & Sherron, R. (1988). Supported work model for persons with traumatic brain injury: Toward job placement and retention. Rehabilitation Counseling Bulletin, 31(15), 298-312.

Content: A description of how a supported work model of competitive employment can be used to assist persons with traumatic brain injury obtain and maintain a job.

• Wehman, P., Hill, M., Goodall, P., Cleveland, P., Brooke, V., & Pentecost, Julian H., Jr. (1982). Job placement and follow-up of moderately and severely handicapped individuals after three years. <u>Journal of The Association for Persons with Severe Handicaps</u>, 7, 5-15.

Content: A three-year job placement project in Virginia, which utilized training and advocacy components, resulted in a 67% retention rate by the 63 client participants most of whom had been previously viewed as inappropriate candidates for employment.

Wehman, P., Hill, M., Hill, J.W., Brooke, V., Pendleton, P., & Britt, C. (1985). Competitive employment for persons with mental retardation: A follow-up six years later. Mental Retardation, 23, 274-281.

Content: This longitudinal study of 167 persons with mental retardation in competitive employment over a six year period showed that participants remained on a particular job an average of 19 months. A supported work model of competitive employment was used.

Wheeler, J.J., Bates, P., Marshall, K.J., & Miller, S.R. (1988). Teaching appropriate school behaviors to a young man with moderate mental retardation in a supported competitive employment setting. <u>Education and Training in Mental Retardation</u>, 23(2), 105-116.

Content: A description of how social skills training and self-monitoring were used to remediate socially inappropriate behaviors of a man with Down Syndrome in a supported employment setti

• White, D.M., & Rusch, F.R. (1988). Social validation in competitive implement: Evaluating work performance. <u>Adapted Research in Menial Retardation</u>, 4. 343-354.

Content: Results of the use of social validation methodology to assess the work performance of individuals with developmental disabilities in nonsheltered employment settings.

• Whitehead, C.W. (1987). The sheltered workshop dilemma: Reform or replacement. Remedial and Special Education, 7(6), 18-24.

Content: This article supports the idea that sheltered workshops for persons with severe disabilities should be reformed to emphasize job placement, transition to more independent work environments, and retraining and replacement of workshop staff.

• Wilson, P.G., Schepis, M.M., & Mason-Main, M. (1987). In vivo use of picture prompt training to increase independent work at a restaurant. <u>Journal of The Association for Persons with Severe Handicaps</u>, 12(2), 145-150.

Content: A picture-prompt training procedure is described and then evaluated for one adult worker with severe disabilities who is employed in a restaurant. Both maintenance and long-term follow-up data support the effectiveness of the training procedures and the satisfaction of the participant's supervisor on the job.

Woolcock, W.W., Lyon, S.R., & Woolcock, K.P. (1987). General case simulation instruction and the establishment and maintenance of we is performance. Research in Developmental Disabilities, & 427-447.

Content: Results of this study confirm that general case simulation instruction can produce generalized responding in the training of community job skills; however, the success of the training was also influenced by other factors which are discussed in detail.

Zirpoli, T.J., Hancox, D., Wieck, C., & Skarnulis, E.R. (1989). Partners in policy-making - Empowering people. <u>Journal of The Association for Persons with Severe Handicaps</u>, 14(2) 163-167.

Content: A description of the Partners in Policy-making program which is an example of one empowerment and self-advocacy training program for individuals with disabilities and/or their parents. The Partners in Policy-making program is currently in its third year in Minnesota.
